Software Engineer

Backend Developer with 2.8 years of experience building scalable, secure backend systems for fintech and real-time SaaS platforms. Skilled in Java, Spring Boot, REST APIs, Kafka-driven microservices, and WebSocket-based real-time features, with hands-on experience in Spring Security, JWT, and performance optimization.

Skills

Languages: Java, JavaScript

Backend: Spring Boot, Spring MVC, JPA, JWT, Spring Security, Node.js, Express.js, REST APIs, PostgreSQL, MySQL

Frontend: React.js

Tools & Technologies: Git, Postman, Docker, Kafka, Agile(Jira), JUnit, Mockito, Redis

Experience

Software Engineer, LTM Dec 2024 – Present

- Developed and enhanced **RESTful APIs** for a Spring Boot-based loan origination platform, implementing business logic across the Controller, Service, and Repository layers.
- Implemented **JWT-based authentication** using **Spring Security**, with a custom filter to validate tokens on incoming requests and restrict access based on user roles.
- Built centralized **exception handling** and request validation, standardizing error responses and reducing malformed-request failures reaching the service layer by **30%**.
- Identified and resolved an **N+1** query issue on the loan-listing endpoint using **JPA fetch joins**, cutting average response time from **1.2s** to under **400ms**
- Published and consumed **Kafka events** for loan approval and status update workflows, decoupling the loan service from downstream notification and audit services.
- Wrote unit and integration tests using **JUnit and Mockito**, maintaining **70%** code coverage on newly developed modules.

Associate Software Engineer, Flocci Technologies Private Ltd. Jan 2024 – Nov 2024

- Engineered backend services using **Spring Boot** for a real-time audience engagement platform supporting polls, surveys, quizzes, and live sessions.
- Developed **RESTful APIs** for content creation, voting, response collection, and analytics aggregation, ensuring high availability and data consistency.
- Designed and Implemented **WebSocket/STOMP-based** real-time event-driven communication to broadcast poll and voting updates instantly to active dashboard clients.
- Secured microservices using **JWT-based** authentication and authorization, protecting platform resources and user-specific dashboards.
- Utilized **MongoDB** for scalable storage and retrieval of poll, voting and analytics data.

Education

Nitte Meenakshi Institute of Technology, Master of Computer Applications Bengaluru | 2022 – 2024

- GPA: 8.5/10

MMHAPU, Bachelor of Computer Applications Patna | 2018 – 2021

- GPA: 7.8/10

Certifications

Javascript Intermediate : Hackerrank certificate

Cloud Computing and Distributed Systems: NPTEL certificate
