Software Engineer

Backend developer with 1.5 years of experience building REST APIs and backend services in Java and Node.js, across enterprise and startup environments. Hands-on with Spring Boot, Spring Security, JPA/Hibernate, and PostgreSQL, with exposure to real-time systems and Docker-based deployments

Skills

Languages: Java, JavaScript

Backend: Spring Boot, Spring MVC, JWT, Spring Security, Node.js, Express.js, REST APIs, PostgreSQL, MySQL

Frontend: React.js

Tools & Technologies: Git, Postman, Docker, Agile(Jira), JUnit, Mockito

Experience

Software Engineer, LTIMindtree. Dec 2024 – Present

- Worked on **RESTful APIs** for a fintech loan-origination platform built on Spring Boot, contributing to features across the Controller, Service, and Repository layers.
- Implemented **JWT-based authentication** using **Spring Security**, with a custom filter to validate tokens on incoming requests and restrict access based on user roles.
- Added centralized exception handling using **@ControllerAdvice** and request validation using **@Valid**, ensuring consistent error responses and early rejection of malformed requests
- Identified and fixed an N+1 query issue on the loan-listing endpoint using **@EntityGraph**, which noticeably improved API response times.
- Debugged and resolved **NullPointerException** and **LazyInitializationException** issues identified during **QA**, improving overall API stability.

Software Development Intern, Flocci Technologies Private Ltd. May 2024 – Oct 2024

- Developed a real-time polling system with dynamic dashboards, enabling poll creation and live voting, increasing user engagement by **40%**.
- Engineered high-performance backend APIs using **Node.js** and **Express.js**, streamlining business logic and improving response reliability by **30%**
- Optimized database interactions with **PostgreSQL**, reducing query load and improving performance across the poll lifecycle by **35%**.

Projects

Flocci Polls <https://polls.flocci.in>

- Developed a responsive, real-time polling platform using **React.js**, featuring a personalized dashboard for seamless poll creation, voting, and live analytics.
- Engineered RESTful APIs using **Node.js** and **Express.js**, enabling seamless poll operations and real-time result aggregation.
- Integrated real-time communication using **Socket.io**, enabling instant dashboard updates and seamless client-server interaction for live voting.

Education

Nitte Meenakshi Institute of Technology, Master of Computer Applications Bengaluru | 2022 – 2024

- GPA: 8.5/10

MMHAPU, Bachelor of Computer Applications Patna | 2018 – 2021

- GPA: 7.8/10

Certifications

Javascript Intermediate : Hackerrank

certificate

Cloud Computing and Distributed Systems: NPTEL

certificate
